FABRIC SOLUTION ASSESSMENT · FABRIC JOURNEY · STEP 2 OF 4

Are you Fabric ready? **Find out.**

In a structured process in workshop format we develop your Fabric data strategy together – based on your individual requirements and on proven blueprints. At the end you know what your analytics and AI infrastructure can look like with Microsoft Fabric and what the way there costs.

Workshop sessions	per session	Roadmap with cost estimate

AT A GLANCE

The Fabric Solution Assessment by Obungi is a structured workshop process with which companies evaluate Microsoft Fabric for themselves. In three workshop sessions of four hours each, Obungi experts analyse the current data landscape and the requirements, show Fabric in a demo, identify potential and risks and evaluate use cases. The result is a documentation, the concept of the target architecture, an effort and cost estimate for Microsoft licences and implementation, and a roadmap.

SERVICE	Fabric Solution Assessment
PROVIDER	Obungi GmbH, Microsoft Fabric Featured Partner
FORMAT	Workshop series with Obungi experts
DURATION	3 sessions of 4 hours each
FOR WHOM	Companies that are evaluating Microsoft Fabric and need a basis for their decision
RESULT	Documentation of the results, Target architecture, Effort and cost estimate, Roadmap
PART OF	Microsoft Fabric Journey

STARTING POINT

When this step **is the right one.**

Would you like to explore Fabric and evaluate it for your company?

01

Many sources, growing data volumes

Data comes from more and more systems. Collection and preparation become complex, data sets unclean or duplicated.

02

Governance is missing

It is unclear who is responsible for which data, who may use it and which figure is the right one.

03

Too many tools, too high costs

A multitude of possible solutions and vendors drives licence and support costs – and makes the decision harder.

SCOPE

What **is included.**

- ✓ 3 workshop sessions of 4 hours each together with our experts
- ✓ Analysis of your current data landscape and your requirements
- ✓ Fabric demo
- ✓ Identification of potential and risks
- ✓ Evaluation of use cases

Fabric Featured Partner

- Involved in the development of Microsoft Fabric even before the official launch
- Direct contact with the Microsoft Fabric development team
- More than 80 successfully completed Fabric projects

Fabric Featured Partner

Obungi is a Microsoft Fabric Featured Partner.

PROCESS

Three steps **to the result.**

01

Starting point & requirements

Session 1 · 4 hours

- Analysis of the current data landscape
- Requirements and goals of the business departments and IT

02

Fabric, potential & risks

Session 2 · 4 hours

- Fabric demo
- Identification of potential and risks
- Evaluation of your use cases

03

Target picture & roadmap

Session 3 · 4 hours

- Concept of the target architecture
- Effort and cost estimate
- Roadmap and next steps

Request the assessment →

RESULT

What you **have at the end.**

Documentation of the results

All findings from the workshops, recorded in a traceable way.

Target architecture

The concept of your analytics and AI architecture with Microsoft Fabric.

Effort and cost estimate

For Microsoft licences and for the implementation.

Roadmap

The steps to productive use, in a sensible order.

MICROSOFT FABRIC JOURNEY

One step on **your way to Fabric.**

The steps build on each other but can also be booked individually. You start where you currently are.

STEP 1

Intro call

Free of charge

STEP 2 YOU ARE HERE

Fabric Solution Assessment

Three workshops to your Fabric data strategy: target architecture, cost estimate and roadmap.

STEP 3

Fabric Test Drive

Try Fabric for 60 days with a trial licence – accompanied by our experts on a test use case.

STEP 4

Fabric Project

Your first Fabric use case, implemented for production – with security concept, testing and documentation.

FAQ

Frequently asked questions about the **Fabric Solution Assessment**

What is the Fabric Solution Assessment?

A structured workshop process by Obungi in which companies develop their Fabric data strategy: three sessions of four hours each with an analysis of the data landscape, a Fabric demo and an evaluation of potential, risks and use cases.

What do we receive at the end of the assessment?

A documentation of the results, the concept of the target architecture, an effort and cost estimate for Microsoft licences and implementation, and a roadmap.

Are we "Fabric ready" – and how do we find out?

That is exactly what the assessment clarifies: we assess your data sources, your governance and your use cases and use blueprints to show what is needed before productive use.

What happens after the assessment?

With the Fabric Test Drive you try out the platform on a test use case, or you implement your first use case productively right away in the Fabric Project.
